Stine MX709-20 brand corn features two modes of action for above-ground insect protection. It's tall enough for gently rolling hills and is broadly adaptive across yield environments. It has strong root structure and stalks and can handle variable soil types. MX709-20 is agronomically solid but will benefit from a mid-season fungicide application when used in heavy disease pressure environments.

- Above-ground insect protection
- Medium plant/ear height will work excellent on gently rolling hills
- Industry-leading fungicide and insecticide treatment
- Yielded 105.5% of trial average in 3-year average Stine Mid Elite Trials
